

What is Location Network?

. . . jumpstarting your scouting needs . . .

Location Network provides the entertainment industry with virtual location scouting through our data base of over 900,000 images of the Los Angeles and surrounding areas. When you need a location, all you have to do is call or place an online order for a "Category." Our skilled Location Consultants will select locations to match your specs.

You can view your locations by logging into your own secure, private Location Network page. Your folders will be in a custom Lightbox that allows you to view, organize and print images. In addition, you will get access to their contact and permit information as well as maps. From your Lightbox, you can edit your locations to create a customized Screening Room of select images which can be accessed or emailed and viewed by anyone of your choosing.

Location Network is ***fast***

- Quick turnaround and delivery of Lightbox.
- Once on the site, you won't need to wait around for images to load --- it is designed for speed.

Location Network is ***easy***

- If you can Google, you can navigate our site. It's that simple. If you do need help, just give us a ring. We're here for you.

Location Network is ***powerful***

- No matter how many locations you have or how many changes you need to make, the site will work for you. It was designed for production. And we all know it's a jungle out there.

Location Network is ***affordable***

- \$300 will buy you a Category with a minimum of 20 locations with accompanying images, contact and permit information for each location.

Whether we jump start your next job to get your scout going in the right direction, or handle all your location needs, you will love the results.

Location Network Pricing
\$300 – Category
\$50 – Single Location
